

## WEB ACCESSIBILITY

Although the Web is fundamentally designed to work for all people, research shows that 20-25% of the population is facing obstacles in everyday use of the internet. Web accessibility means that people with disabilities can use, perceive, understand, navigate, and interact with the Web.

Here, at ECI, we are committed to making our own website usable by all people, whatever their abilities or disabilities.

Certification of "Web Accessibility" is an initiative of "Access Israel" and ISOC. The certification is given to sites that have made necessary adjustments to make them accessible to people with disabilities. The purpose of this certification is to promote public awareness of web accessibility and informing the public about the extent of non-accessibility.

This site complies with regulations for Equal Rights of People with Disabilities (for improved access of service), 2013. The site complies with the recommendations of the Israeli Standards (IS 5568) web content accessibility AA level and recommendations document WCAG2.0 by W3C. For more information click here (<http://www.aisrael.org/>).

Find the right assistive technology to customize this site to your needs

While the site has been created to be usable 'as is', many people are likely to get the most accessible experience of using this site by customizing their computer to suit their individual needs – for example: to get the site spoken to them, to change its color-scheme, or increase the size of its fonts. That said, the site is optimized to display common browsers and on mobile phones.

### How to navigate the website?

- **Changing font size** - you can increase and decrease the font size on site
- **Navigating between pages** - the site is divided into areas such as major content areas. Beginning / end of the region have a link button turning various parts of the page being determined by the user. For example, the possibility to skip to content on the page.
- **Change colors** - You can change the colors so the site is convenient and easy to read, before changing colors press the Reset colors. When changing the colors of the site - the font automatically changes the font Ariel known accessible.
- **Keyboard navigation** - you can navigate forward with the TAB button. To navigate back press the key combination Shift + Tab.
- **Reader** - in order to obtain an optimal online experience with screen-reading software, we recommend that you use the latest NVDA software.

### Limitations of this sites accessibility

- **List of sales and service centers** - View menu shows the reader Google PDF files. To return the previous screen press the browser's back button.
- **Content from other sites** (like Facebook) - because the information used is taken directly from the other site's page, this may limit site accessibility.

**Let us know if you have difficulties using this site**

Although every effort has been made to make this site accessible, if you find anything on the site difficult to use please let us know on our [Contact](https://pages.ecitele.com/contact-us) form (<https://pages.ecitele.com/contact-us>).
