

# ELASTIC REVENUE-GENERATING BUSINESS SERVICES

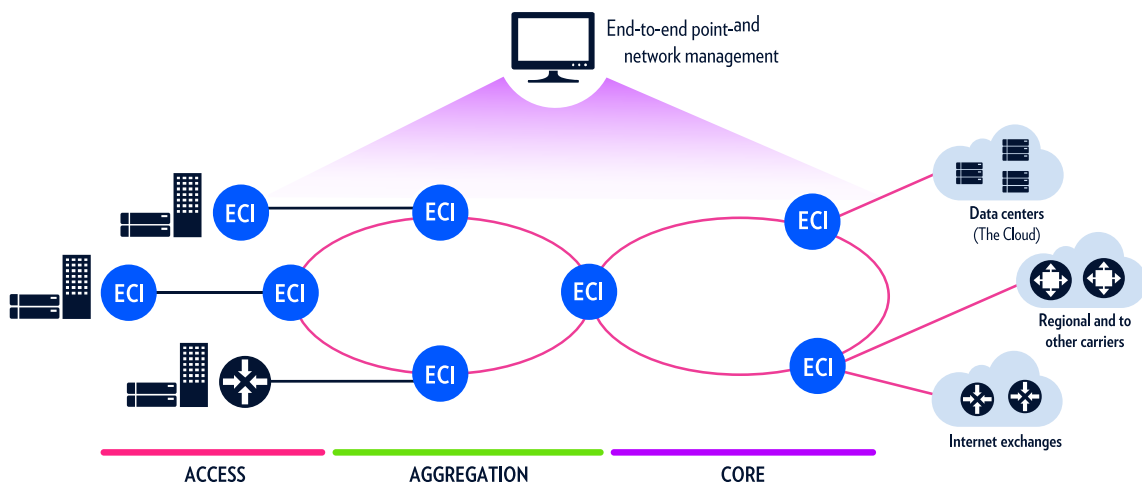

## CUSTOMERS COME FIRST

Enterprise and SMB customers are now demanding a wider range of services with higher bandwidth, flexibility, and responsiveness. This is due to increased reliance on data centers, cloud operations, global operations, and advanced information exchange. These customers want their services to respond to their needs quickly, and they expect high-quality, secure carrier-class connections. They want everything from sophisticated Layer 3 VPN services, to standard Layer 2 services, to simple optical connectivity. Consequently, service providers need a comprehensive solution that can meet the needs of business services customers - quickly and cost effectively.

ECI's ElastiNET™ solutions are designed specifically for the needs of service providers, offering a complete end-to-end (E2E) business services solution with intelligent value-added capabilities for additional
