

THE PERFECT SOLUTION FOR SERVICE PROVIDERS

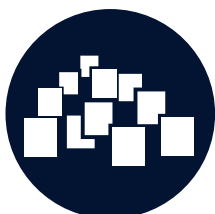

Increased mobility, the move to cloud-based applications and improved technology have all affected customer expectations. Today's customers are demanding a wider range of services with higher bandwidth, flexibility and responsiveness. To cope, small and medium sized service providers must continually invest in their underlying network infrastructure.

However, modern networks have unique requirements that make them more complex than networks of the past. As the number of services increases and the demand for bandwidth explodes, service providers are faced with difficult decisions about how to grow and evolve their networks economically with limited available resources.

With these challenges in mind, ECI has designed best in class solutions which are tailored to the needs of small and medium sized service providers. Designed to offer strong networking solutions from concept and deployment to ongoing management, ECI offers:

SERVICE VARIETY

For legacy as well as new services

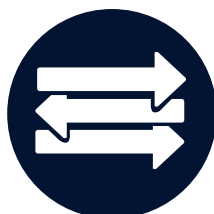

SERVICE AGILITY

For improved network responsiveness, faster turn-up and enhancement

SIMPLIFIED OPERATIONS

To minimize expenditures and maximize resources

INCREASED PROFITABILITY

Faster time to market and reduced OPEX

SIMPLE PLANNING AND PROVISIONING

For network right-sizing & longevity

DESIGNED WITH YOU IN MIND

YOUR CHALLENGES

OUR SOLUTIONS

Service Variety - Transport multiple services in a way that is easy to manage and economical to deploy and operate

Neptune Packet-Optical Product Line - supports a wide range of packet services including:

- L2/L3 VPNs,
- ELASTIC MPLS (for both IP/MPLS and MPLS-TP),
- Layer 1 via OTN, and
- Legacy T1 support via circuit emulation

Apollo Optical Product Line - capabilities:

- Up to 400Gbps with software upgradable interfaces
- Optional OTN switching fabric that can support efficient transport of TDM, LAN/WAN, SAN, and other services.
- Integrated L1 optical encryption is available for enhanced security, integrated optical/ packet service offerings

Service Agility - Applications such as improved connectivity, increased security, and added redundancy must be designed, provisioned, and installed quickly

LightSOFT® End-to-end, network management system

- Simple, user friendly, point and click GUI
- Unified multi-layer network management

Muse™ applications provide unparalleled service activation, modification and agility

Simplified Operations - Powerful yet simple to use, providing advanced networking capabilities without extensive resource requirements

LightSOFT® for ease of service establishment and monitoring

- Uniquely scalable - up to 20K NEs

Muse™ Service Manager - speeds up and automates the service operations lifecycle

Muse™ Network Manager - speeds up and automates the network operations lifecycle

LightINSIGHT™ for advanced network analytics

Increased Profitability - Offer an innovative set of new services and business models in order to maximize income - yet keep costs down

Elasticity of ECI's hardware and solutions

- Small size,
- Low power consumption, and
- Cost-effectiveness

Simple Planning and Provisioning - Grow the network elastically and organically without requiring prior knowledge of all demands in the network

ECI's hardware and solutions are both designed for expansion and growth in unpredictable environments.

Scalability

- Transport product lines - can scale up to 400Gbps per wavelength and beyond with software upgradable interfaces.
- LightSOFT® - can scale economically from a few tens of elements to tens of thousands of elements.

Pay as you grow architecture - providing a shorter time to revenue and more elastic overall solution for the future.

ABOUT ECI

ECI is a global provider of ELASTIC network solutions to CSPs, utilities as well as data center operators. Along with its long-standing, industry-proven packet-optical transport, ECI offers a variety of SDN/NFV applications, end-to-end network management, a comprehensive cyber security solution, and a range of professional services. ECI's ELASTIC solutions ensure open, future-proof, and secure communications. With ECI, customers have the luxury of choosing a network that can be tailor-made to their needs today - while being flexible enough to evolve with the changing needs of tomorrow.
